

USER INTERFACE

E30095 – HEX SWITCH

E30095

FUNCTIONAL DESCRIPTION

Those series offers small, convenient remote control boxes to activate seat functions on a variety of rehab applications.

The **E30095** switch box is used as a multi-function switch interface that features a 4-positions joystick. 2 LEDs (red and yellow) are visible to advise the user. If you are connected to the Quattro (E23050) the DLO will be red and the HS, yellow.
